Dear Professor Norrie McPherson,

The Richmond Fellowship Scotland (TRFS) is fully supportive of Tony Priest's University studies into medication management and in particular medication error causation within the organisation.

It is envisaged that Tony's studies will be a benefit to the organisation and the care sector at large, in understanding medication errors and the human behaviours that contribute to why medication errors occur. TRFS give permission for Tony to access our accident/incident database to be used in his studies and speak/interview staff within our organisation.

If you require any further information or clarity please do-not hesitate to contact me.

Yours sincerely,

George Welsh (Executive Director for Health and Safety)
The Richmond Fellowship Scotland
